retail display

The range of display solutions have been designed using a modular approach and can be adapted to suit most retail display applications.

//a complete retail display solution

The range of retail display products provide high quality, cutting edge solutions for retailers, brands and designers. The versatility of the Modular System has been used to create a product range including: counters, showcases, display stands and stand alone retail merchandising units.

//retail display

The system can also be customised to create light walls, partitions, cladding and bespoke displays and is the retail display system of choice both internationally and in the UK.

introduction

Counter Showcases Secure counter range available in standard and bespoke configurations to suit specific needs.

Tower Showcases Can be used free standing or linked in a modular layout and enhanced with stunning lighting and finishes.

Gondolas Made from 8mm tempered safety glass, offering contemporary open displays with no barriers to purchase.

//choice

All display products are designed and manufactured to the highest specifications. The system offers unbeatable quality and flexibility and presents the opportunity to create the retail display layout and environment you desire.

retail display solutions

your choices

Display Stands Shelving units, illuminated walls, product display stands. The design team can deliver solutions for all.

Retail Merchandising Units Allow brands and retailers self-contained secure merchandising opportunities in areas offering maximum impact.

The wide range of feature profiles and accessories, create individual and inspirational interior displays.

//a complete retail display solution

By combining the range of retail display profiles with material finishes including real wood veneers, digital graphics, tempered glass and lighting, simply stunning designs are created. Be it secure or open stands, offers design solutions that your competitors will envy.

//design

anodised aluminium profiles are at the heart of all our retail display products. All showcases are factory built, tested and ready to use.

eye catching products

By imaginatively combining profiles from the range and blending them with other materials and finishes, unique displays can be created to give your interior that premium look.

design and detail

Castors All showcases are supplied with twin wheel swivel castors as standard. Inset shows optional tilt glide feet.

Lighting Halogen spotlights offer adjustable and intense product illumination for maximum impact.

LED Edge Lighting LED edge lighting combined with product illumination ensures that your products will not be missed.

Security is paramount in all counters.
Our standard range has locking glass sliding doors to both display and storage areas.

The counter range is set apart by its simplicity. A versatile range of counters and till points allows you to create stylish and effective retail environments to meet every conceivable need.

//counter showcases

counter showcases are equally effective when used freestanding or linked together to create islands and flush fit counter display solutions.

retail display solutions

counter showcases

## //unique contemporary design

The range consists of all glass, glass with storage facility and all storage counters. Corner units, till points and counter tops provide infinite linked solutions to fit any space.
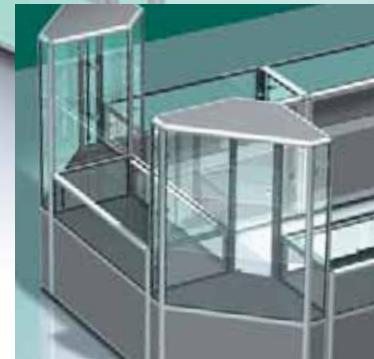

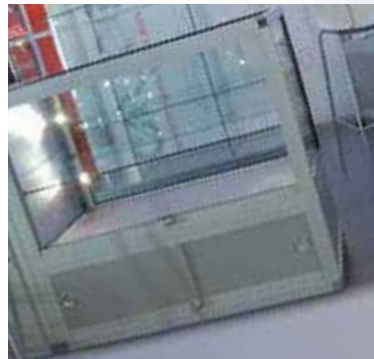

//created to complement any layout

Combining the various elements of the Unibox counter range gives retailers and designers the option of creating island displays or full store interiors for maximum merchandising effect.

//create

There is a wide range of standard sizes that can be complemented with our bespoke unit design service.

01. Till Points

Designed to accommodate PC storage, cable management, cash desks and monitors.

02. Counters

Available in various dimensions with combinations of display and storage to suit most requirements.

03. Corner Units

Designed to be combined with counters for island displays.

04. Corner Towers

Combined with counters corner towers offer maximum merchandising potential.

05. Counter Tops

These cabinets offer POP merchandising potential, can be branded and co-ordinated with counter configurations.

The standard cabinet range is available in satin silver finish, with other finishes available on request including chrome, polished gold, wood grain and stainless steel effects.

All cabinets are manufactured in the UK using tempered safety glass (BS6206 class A).

Tower showcases are the most popular choice for both retailers and brands. They offer maximum visual impact, securely displaying all manner of high value or fragile goods and can be merchandised to consistently promote sales. Many leading international brands choose towers for their instore POP displays.
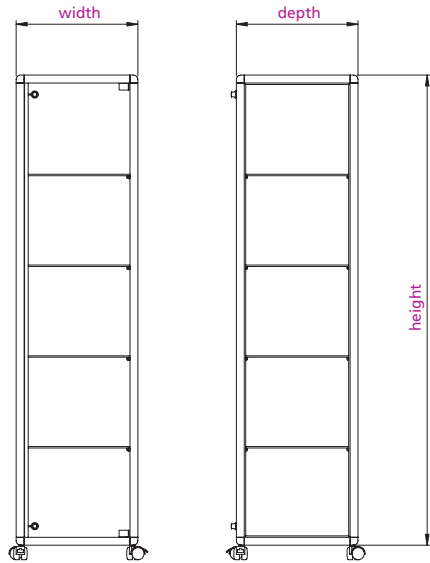

//tower showcases

towers offer visually appealing, secure display solutions that can be configured to offer brand identity or co-ordinated with your interior finishes.

Inspired by a visit to Ferrari in Maranello, Italy, the Blade design encompasses details from the F1 cars on display and the beautifully designed store interior.
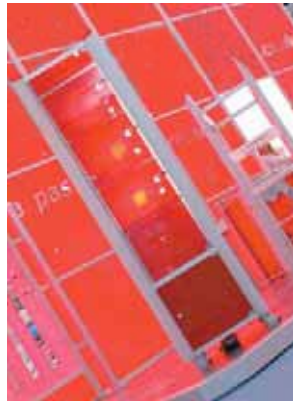

The blade showcase range was conceived as retail furniture that can be combined with graphic displays to create stunning and highly individual retail display units. The aerofoil shaped corner profiles make a bold statement and are particularly suitable for product promotions.
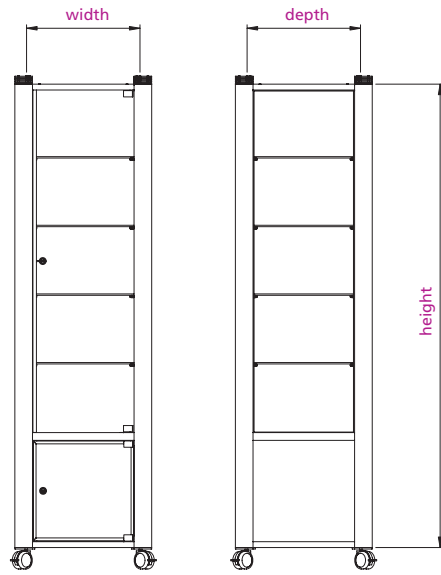

//blade showcases

Designers have selected the range to promote fashion items, electrical goods, cameras, perfumes and cosmetics.

Constructed from 8mm CNC machined, tempered safety glass and joined by chrome plated connector brackets, the gondolas sit on sturdy 18mm thick wooden bases that are offered in a range of finishes that match those of showcases.

If your perception of a retail merchandising unit is a brightly painted horse and cart (minus the horse!), awkwardly sitting in a shopping mall walkway, crammed with goods, think again.

RMUs well and truly break the mould. Manufactured in the UK with the structural elements of the Modular System, they are more like miniature modernist buildings than market stall carts.

Extensive use of aluminium profiles, tempered safety glass, CNC fabricated steelwork and electrically operated security shutters ensure that Unibox RMUs can be styled to meet retailer and brand aspirations.

//retail merchandising

Our standard and bespoke solutions will attract maximum sales impact in areas of heavy foot fall. They offer mall and other property managers the opportunity to create extra retail floor space and premium income.

retail display solutions

RMUs

RMUs are fully factory built in modules and assembled at site in record time without the need for civil work.

//individually designed to meet your needs

If you want to maximise sales in public spaces, be it fashion ware, consumer electronics, jewellery, flowers, cameras or brand promotions… why not explore the possibilities with the design team.

units

All power and data transfer requirements can be accommodated and are designed and inspected by NICEIC approved electrical engineers. Firetrace® automatic fire detection and extinguisher system, configured and fitted by our own certified engineers, complies with legislation and protects your investment.

Design details and construction quality match those of architect designed, modern buildings. RMUs are designed to perform…for years.

For an individual look, showcases can be powder coated to match corporate colours and branding.

All our wall mounted cabinets are supplied with heavy duty keyhole brackets enabling them to be securely yet discreetly fixed to the wall. Made to the same exacting standards as our counters and towers, wall mounted cabinets can be supplied both with and without lighting and can also be supplied with branded or illuminated header panels.

//wall cabinets

Wall mount cabinets are perfect for mounting at eye level and take up no floor space making them ideal for smaller spaces.
